Building Brick Challenge

CITYSCAPE

Building Brick Challenge

Are you ready to get serious with your bricks? Jump into **Cityscape**, our building brick challenge, and see whether you have what it takes not just to build, but to build big!

For this challenge, build a city of at least 9 square feet (.84 square meters), and at least 1 foot (30.5 cm) in height using only building bricks.

Your city must have:

- Transportation infrastructure;
- Residential, commercial, and industrial areas; and
- Public spaces.

More important than those minimum requirements is how are you going to challenge yourself to make this cityscape not just another pile of bricks?

Get creative, and don't accept your first draft as your final draft. Continue to iterate until time runs out to see what you are truly capable of building!
