Hackathon Design Challenge

A number of cadets want to do a hackathon, but who is going to be the brave soul that designs the challenge?

Will it be you? Will it be you working with a team?

Your challenge can be easy, or hard, and designed to take whatever length of time you think is best.

You can pick a challenge of your own unique creation, or set as a goal something that will enrich the lives of your fellow cadets at Launchpad23.

The choice is yours.

The power is yours.

What will you challenge your fellow cadets to do with it?
